

LATHE

Mastercam Lathe lets you move the same part file between milling and turning operations with ease and confidence.

POWERFUL, FLEXIBLE TOOLS FOR TURNING

A set of tools that streamline your entire process.

From importing CAD files to Dynamic roughing and precision finishing, Mastercam Lathe gives you a variety of strategies to turn parts with greater efficiency and productivity.

Efficient programming, designed for modern manufacturing.

Mastercam Lathe delivers a set of easy-to-use, advanced programming tools, with greatly expanded options when paired with Mastercam Mill. Easy rough, finish, thread, groove, bore, and drill routines combine with C/Y-axis machining to cut any job. Dependable toolpath verification ensures your parts are done right the first time.

Fast, easy turning.

- Program in a few clicks with Quick Toolpaths.
- Complete threading including custom thread forms.
- Grooving with multiple depth cuts, peck motion, and full-radius plunge turning.
- Intelligent ID, OD, face roughing, and finishing.
- Full milling support available for machines with live tooling or C and Y axes.

Safe machine and cut control.

- Chuck, part, steady rest, and tailstock detection.
- Automatic gouge checking on the tool's front and back.
- Control chip breakage on difficult-to-machine materials.
- Full collet and solid jaw support.
- Expanded job setup, part transfer, and programming options on select lathes.

SAVE TIME AND MONEY

100 Hastelloy parts cut with and without Dynamic Motion toolpaths.

WITHOUT DYNAMIC

X

\$100/hour machine cost = \$500
12.5 inserts per part @ \$25 = \$312.50

\$812.50 per part x 100 parts
= \$81,250

WITH DYNAMIC

X

\$100/hour machine cost = \$66
1.5 inserts per part @ \$25 = \$37.50

\$103.50 per part x 100 parts
= \$10,350

Cycle time and cost reduction of 87%
